

Eastern Energy Expo  
May 24 - 26, 2021

# Request for Presentation

Are you interested in sharing your expertise with those who are responsible for providing energy and home comfort services to millions of consumers in the Northeast? We're looking for speakers for the 2021 Eastern Energy Expo. Our open Request for Presentations process brings some of the best industry experts to present at our conference, and that could be you! If you would like to be considered for participating as a presenter, please fill out the form below. If you are submitting multiple topics, please fill out a separate form for each topic. Please note that the deadline to submit your abstract is January 11, 2021.

**New this year:** All presentations will be produced live via Eastern Energy Expo's production studio. Staff will direct production of the session and all sessions will be recorded and available on EEE's YouTube channel. In addition, at the conclusion of the session, speakers will have the option to connect with attendees via live video/chat in a separate "room" on the platform.

NOTE: The Eastern Energy Expo committee will be reviewing all submissions to ensure that presentations are educational and not merely self-promotion for your company and/or product. Presentations cannot be sales pitches. However, for some Technical Track programs, products may be used for demonstration purposes. **If selected, you will be required to submit the final version of your presentation to the committee prior to April 30, 2021. Presentations not received by April 30 may be removed from the program.**
